SignFlow Beta — Launch Announcement Templates

Copy/paste-ready messages to announce the beta to your team. Pick the channel and customise the bracketed bits.

1. Email announcement (HTML-safe plain text)

Subject: Introducing HQHB · SignFlow — your account is ready

Hi team,

Today we're rolling out HQHB · SignFlow – our new internal tool for document approvals. Instead of WhatsApping PDFs around or emailing scanned signatures, you'll submit, track, and download signed copies all in one place.

Request. Review. Approve. Track. All in one place.

WHAT YOU CAN DO

- Submit any document for approval (PDF or Excel, up to 14 MB)
- Route to a specific team OR a chain of signers
- Get a clean, signed PDF back with full audit trail
- Approve documents from anywhere – desktop, tablet, or phone

GETTING STARTED

1. You'll receive a separate welcome email with your sign-in credentials (look out for "Welcome to HQHB SignFlow").
2. Sign in here: <https://onesign.devhqhb.online>
3. On first sign-in, you'll be asked to register your signature – either draw it (best on touch devices) or upload an image.
4. Change your password from the top nav once you're in – pick something you'll remember.

GUIDES

We've put together a short user guide covering everything from submitting your first request to approving on mobile. Attached to this email. ~5 minute read.

Find the QUICK REF card pinned to your team's space – one-pager with everything you need day-to-day.

SUPPORT

Questions, bugs, anything broken – ping me directly or email it@hqhb.in.

This is a beta. Treat it like one – the more feedback you send, the faster it improves.

Welcome aboard.

– Taha
IT Admin, HQHB

2. Short WhatsApp / Teams message

🌈 HQHB · SignFlow is live (beta)

A separate email is on its way with your sign-in credentials.
Sign in at <https://onesign.devhqhb.online> and register your signature on first login.

User guide: [attach / share link]

Questions: ping me or it@hqhb.in

– Taha

3. Slack-style channel announcement

:tada: *HQHB · SignFlow is live (beta)*

A short pitch: instead of chasing signatures over coffee, you submit a doc, pick who needs to sign, and download the signed copy when it's done. Mobile-friendly, full audit trail.

To start:

1. Check your inbox for "Welcome to HQHB SignFlow" – has your sign-in details.
2. Go to <https://onesign.devhqhb.online>
3. Sign in → register your signature → you're set.

:book: User guide is in the channel files (`user-guide.pdf`).

:question: Anything off → ping me or `#it-support`.

4. Follow-up reminder (Day 3)

For users who haven't signed in yet.

Subject: Quick reminder — your SignFlow account is waiting

Hi [Name],

Quick reminder: your HQHB · SignFlow account is ready but I don't see you've signed in yet.

It takes 2 minutes:

1. <https://onesign.devhqhb.online>
2. Sign in with the credentials in the welcome email I sent on [date].
3. Register your signature (draw it or upload – whichever is faster).

If the welcome email is in your spam folder or you can't find it, just reply to this and I'll resend.

Why bother now? The next time you need to submit or approve a document, SignFlow will route everything to you here.

– Taha

5. Approver-specific note

For users you've added as approvers – they need to know they're going to start receiving requests.

Subject: You're set up as an Approver on SignFlow – what that means

Hi [Name],

I've added you as an Approver on the [Team Name] team in HQHB · SignFlow.

This means: when anyone submits a document that needs sign-off from [Team Name], you'll get an email notification and the request will appear in your "Pending approvals" tab.

WHAT TO DO RIGHT NOW

1. Sign in: <https://onesign.devhqhb.online> (credentials in the welcome email).
2. Register your signature – required before you can approve anything. Draw it on a touchpad or upload a scanned image.

WHEN A REQUEST COMES IN

Open the doc → review → click "Preview & approve" to see your signature on the page → click "Confirm approval".

Or "Reject" with a reason – the requestor gets your feedback.

Once you approve, there's a 1-hour cooling window where you can withdraw the approval if you change your mind.

User guide: [attach / link]

Questions: it@hqhb.in.

– Taha

6. Post-launch retrospective (Day 14)

After two weeks, send a "how it's going" check-in.

Subject: SignFlow — two weeks in, here's where we are

Hi all,

Two weeks since SignFlow went live. A quick update:

THE NUMBERS

- [N] requests submitted
- [N] approved, [N] rejected, [N] still pending
- Average time from submit → final signature: [X hours]

WHAT'S WORKING WELL

- [Highlight 1 from your usage]
- [Highlight 2]

KNOWN HICCUPS

- [Any bugs found, what's been fixed, what's still in the queue]

WHAT I NEED FROM YOU

- If you've been holding off because something didn't work, please tell me what.
- If you're using it daily and have ideas, send them my way.

— Taha

Attachments to include

When sending the main announcement, attach (or link to):

- `user-guide.pdf` (export `docs/user-guide.md` to PDF)
- `quickref.pdf` (export `docs/quickref.md` to PDF)

HQHB · SignFlow. Internal use only. Beta 1.0 — June 2026.
