

SignFlow — Requestor Guide

Submitting documents for signature

Before you start

1. Sign in at <https://onesign.devhqhb.online/> with your email and temporary password; change your password.
2. Register your signature (draw or upload). This is required before your first request — you can defer it, but you'll be asked again.

Your Requestor home — quick actions and your requests at a glance.

Make a new request

1. Click **New request** and upload your document — a **PDF or Excel** file, up to **14 MB**.
2. Choose how it should be approved: **Single approver** (any approver from one team) or **Multi-step workflow** (specific signers, in a set order).
3. Optionally tick **Instant approval** to skip the one-hour cooling window.
4. Place the signature box on the document and pick the team / signers (see below).
5. Add an optional note and **submit**. Each signer is notified in turn.

00 Request type
Classifying the request lets approvers batch-process documents of the same kind.

- Leave Approval**
Time-off, leave forms, attendance approvals.
- Document Approval**
Policies, memos, contracts, letters.
- Expense Approval**
Reimbursements, advances, vouchers.
- Invoice / PO**
Purchase orders, vendor invoices.
- Other**
Anything else needing a signature.

01 Upload document
PDF or Excel (.xlsx) up to 14 MB.

PDF · XLSX

HOW THIS WORKS

- 01 Upload the document.
- 02 Choose single approver or multi-step workflow. Optionally enable instant approval.
- 03 Place each signer's signature box on the page where it should appear.
- 04 Submit. Each signer is notified in turn.

Starting a new request: choose a type, then upload your PDF or Excel.

Single-apprver mode

- Click on the document where the signature should appear to drop one signature box.
- Pick the team — the request goes to any approver with authority for that team.

Multi-step workflow mode

- Add a step, pick the team, then **Add signer**.
- Click **Place signature** and drag a box on the relevant page for that signer.
- Repeat per signer / per step. Cross-team workflows are supported — signers are asked in order.

Track your requests

- **Pending** — see exactly who the request is waiting on. You can send a reminder once every 24 hours.
- **Approved** — preview or download the signed file.
- **Rejected** — see the reason given, then correct and resubmit.

Tip: name your files clearly before uploading — the file name is what approvers and the audit log show.
